J1.5-3.5UT

4-WHEEL ELECTRIC FORKLIFT

WWW.HYSTER.COM

> OVERVIEW

The Hyster® UT series provides the ideal solution to meet your needs, without compromising on performance.

1 HIGH STRENGTH OVERHEAD GUARD

The overhead guard features profiled steel, with high strength materials to help enhance reliability and operator protection.

2 LOW STEP HEIGHT

The conveniently positioned low step provides easy access to the truck.

3 AC CONTROLLER

AC controllers coupled with AC traction and hydraulic motors allow for precise truck controllability. The controllers are easily accessible which can also minimize service time.

THE RANGE

1,500kg – J1.5UT	2,500kg – J2.5UT
1,800kg – J1.8UT	3,000kg – J3.0UT
2,000kg – J2.0UT	3,500kg – J3.5UT

DESIGN

The design of the UT series has been engineered with the operator in mind. The ergonomically designed compartment provides a natural and comfortable environment to help reduce fatigue throughout the shift. A range of standard features and options help to configure the truck to the needs of the application.

4 SMALL STEERING WHEEL

The adjustable steering wheel position provides convenience for the operator as it provides 8 degrees of adjustment. Low steering effort makes it easy to operate in confined spaces.

5 INTEGRATED MOTOR, TRANSMISSION AND AXLE

The compact structure of the drive system provides adequate access for maintenance. Precision cut gears are incorporated, leading to reduced wear and lower noise levels.

6 WIDE VIEW MAST

The wide view mast provides the operator with a significant front field of view, minimizing blind spots and increasing operator comfort, thereby enabling safe, productive and efficient operation.

LOW COST OF OWNERSHIP

The use of high quality and robust components contribute to reliable operations and lower wear and tear. This, together with fast availability of cost-effective replacement parts helps to reduce maintenance requirements and costs.

HYDRAULICS

High quality cylinders with hard chrome rods reduce seal wear for long life. A full-flow, low pressure filter on the return line keeps the hydraulic oil clean, which helps to minimize seal and pump wear. In addition, this keeps the control valve in good condition, which can lead to low service costs.

> ENGINEERED FOR OPERATORS

SAFETY AND STABILITY

- High visibility mast with soft landing absorbs shock
- Controlled mast lowering speed helps reduce damaging product
- Secure overhead guard
- LED lights are standard
- Operator presence system
- Travel speed limiting
- Parking brake

PERFORMANCE

- Simple and clear display of speed, power, error code, working hours to keep the operator informed
- Color display integrated with functions such as performance selection allows the operator to configure the truck to meet different application requirements
- AC traction and lifting motors, with electronic control, deliver a high level of performance

COMFORT

- Hydraulic power steering requires low steering effort without kick-back which helps with precise positioning
- Full suspension seat
- Adjustable steering column and seat to accommodate a variety of operators
- Low entrance step and large floor space
- Ergonomically designed hand brake

SERVICE

- AC traction and hydraulic motors help reduce maintenance cost
- Reliable IP54 design
- The controller assembly is mounted inside the counterweight and is protected by an easy-to-remove cover
- CANbus communication simplifies troubleshooting
