## ➤ A VERSATILE, OPERATOR ORIENTED WORKMATE

The 6,000 lb. capacity walkie pallet truck delivers excellent maneuverability, superior travel speeds and the versatility your operations require. Every W60Z walkie pallet truck uses proven Separately Excited Motor (SEM) transistor technology, giving you the advantage of programmability, with the optional handset. SEM technology simplifies maintenance needs by reducing parts, saving you valuable capital.

In addition, you get the added benefits associated with regenerative braking which include a significant increase in traction motor brush life and its corresponding lower maintenance costs. SEM technology also increases the traction motor's torque range, providing increased travel speeds and bolstering your operation's productivity capabilities.

The W65Z truck's bottom-mounted handle conveniently provides you control of all functions with either hand, including the horn. Its angle hand-grips and raised body design provide "when-you-need-it" protection for your fingers and knuckles.

A creep speed or "turtle" button is located on the operator side of the handle. It allows operation of the truck, even when the handle is in the upright position. The modular design of the handle makes servicing simple.

The handle's raised lift/lower buttons afford intuitive fingertip operation. The handle's traction reversing switch (belly switch) wraps the end of the handle, enabling actuation throughout its full range of pivot.

The W60Z forks feature box-rail construction for increased strength and rigidity, throughout its full 6-inches of lift height. Adjustable two-piece heavy-duty pull rod assembly with replaceable threaded ends allow compensation as load wheels wear. Knock-out axles facilitate easy wheel replacement.

Multi-function display with hour meter provides battery state of charge, low battery lift interrupt, and fault indicator.

# INNOVATIVE TRUCKS ENGINEERED TO MEET THE MOST DEMANDING APPLICATIONS

For more than 80 years, Hyster has been conquering the world's most demanding applications. In the 1920's Hyster started as a manufacturer of lifting machines used in the rigorous logging industry of the United States' Pacific Northwest. A few years later the first forklift trucks were invented and the Hyster brand quickly gained its reputation for rugged quality. Hyster® lift trucks are designed to lower your cost of operations. Every truck we make — gasoline, LPG, diesel and electric — is purpose-built to excel in its application. Every truck is also backed by an unmatched network of specialists.

**Dealer Network** — Our Dealer Network can offer the expertise of fleet managers, parts suppliers, capital procurement specialists and trainers. Carefully chosen dealers fully understand customer applications, assist in selecting the right lift truck and provide fast, reliable support.

**Hyster Fleet Services** — Even if you operate other brands, we can manage your maintenance and replacement plan. We can offer complete fleet analysis, fleet history summary and a cost-effective proposal for replacement and scheduled maintenance.

**Parts** — With genuine Hyster® replacement parts and UNISOURCE™ parts for all makes of lift trucks, we are your one-stop source for lift truck parts. In fact, we offer more than 7 million part number crosses for most brands of materials handling and other in-plant mobile equipment.

**Rental Products** — When leasing or buying isn't a practical option, we have access to more than 14,000 units for short- and long-term rental. We'll help you maintain output in a cost-effective manner.

**Hyster Capital** — We can arrange solutions for special financing requirements, taking the difficulties out of buying the equipment you need. Whether you purchase or lease a new or used lift truck, Hyster Capital offers superior service and competitive rates.

**Special Products Engineering Department (SPED)** — Different materials require different handling. That's why we can work with you to customize your lift trucks. From strobe lights to specially made forks, SPED has the tools to help you get the job done right.

**Operator Training** — Proper education in operating lift trucks minimizes the risk of injuries due to accidents while increasing productivity. Hyster offers OSHA-compliant materials that support the training of qualified operators.

**Service** — Your local Hyster® dealer offers a flexible, customized and comprehensive maintenance plan based on each lift truck's operation environment. Hyster service programs offer scheduled inspections and maintenance, along with quick, responsive service dispatched to your location.
